

MAINTENANCE SUPPORT

MacLellan maintains equipment at an optimal operational level to maximize uptime while enabling increased productivity and reduced mean time between failures.

Our Mission Statement

We bring people together who share our values and help them discover and achieve their potential.

We are disciplined in the development and use of innovative systems and practices.

We are a driving component in our business partners' competitive advantage.

MACLELLAN EXPERTISE: Industrial and facilities maintenance includes many activities for improving the operational performance of equipment and processes. By adhering to Total Productive Maintenance (TPM) principles, MacLellan provides turnkey line maintenance, from equipment inspection and repair to complete preventative maintenance programs. We incorporate predictive methods such as thermal imaging, vibration analysis and ultrasonic leak detection which feed information into an equipment specific database for trend line and analysis. These programs reduce downtime and maximize asset value.

BEST PEOPLE, BEST SYSTEMS, BEST RESULTS

MacLellan provides maintenance support for a wide variety of industries including pharmaceuticals, telecommunications, automotive and heavy equipment. A sample of equipment serviced by MacLellan includes robots, conveyor systems, carriers, HVAC systems, process chillers, air compressors, steam boilers, high and low voltage electrical systems, and various types of process equipment and specialty machines.

Examples of maintenance support services:

- Robot PMs
- Control panel PMs
- Non-contact inspections
- Air handling system maintenance
- Machine lubrication and repair
- Wastewater treatment programs

- Fire safety system maintenance
- Heat transfer system maintenance
- Paint circulating system maintenance
- Process pump maintenance and repair
- Overhead and floor conveyor maintenance
- Jig and fixture design, fabrication and repair
- Light fixture installation and repair
- Relamping
- Plant/process
- Dock leveler and lock maintenance and repair
- Conventional and high speed overhead door maintenance and repair

THE MACLELLAN APPROACH

MacLellan maintenance professionals have saved millions of dollars in avoided downtime and continuous improvement activities. We track key performance indicators in safety, quality, delivery, cost and morale. We also measure results by trend line analysis and machine uptime, process yields, run rates and energy savings. Our role is to maintain equipment at an optimal operational level to maximize uptime while enabling increased productivity. MacLellan is able to effectively manage the preventative maintenance support of critical process and ancillary equipment so you can focus on your core business.

CONNECTED WORLDWIDE

MacLellan managers around the world are linked through knowledge-sharing technology that allows them to learn from each other and share ideas and best practices. The MacLellan web-based "desktop" allows us to disseminate corporate and industry information, collaborate on major initiatives and discuss, review and brainstorm improvement suggestions. It also offers a portal into the MacLellan Academy, a comprehensive library and learning center offering training courses and resource materials across the organization. It is, in effect, a

virtual office environment that enables our employees and customers to take advantage of innovations and process improvements from MacLellan locations all over the globe.

YOUR COMPETITIVE ADVANTAGE

MacLellan works in partnership with the companies we serve. From day one, we are committed to understanding your strategic objectives. We align our goals with yours so that as we work together, we become an extension of your organization. We are committed to continuously improving our operations, and thus our service delivery, which ultimately drives your competitive advantage. Because your business is our business, we are the trusted advisor that you turn to for industry knowledge, technological advancements and process efficiencies.
