

PROJECT MANAGEMENT

As an extension of your team, our goal is to reduce costs, resources and downtime required to perform project work throughout your facility.

Our Mission Statement

We bring people together who share our values and help them discover and achieve their potential.

We are disciplined in the development and use of innovative systems and practices.

We are a driving component in our business partners' competitive advantage.

MACLELLAN EXPERTISE: MacLellan offers project management as an extension of our existing on-site support services. The breadth of our support stretches from cleaning and maintenance projects to engineering, design and fabrication. As experienced project management professionals, MacLellan understands site policies, safety procedures and quality expectations. We are able to quickly respond and mobilize for both emergency and planned events, minimize equipment downtime and ultimately reduce facility operating expenses. We also coordinate contractor performance to give you more time to focus on your core business and increase your competitive advantage.

BEST PEOPLE, BEST SYSTEMS, BEST RESULTS

MacLellan provides project management in a number of industries including telecommunications, pharmaceuticals, heavy equipment and automotive. In these industries we work on a wide variety of equipment and systems.

Project management experience:

- Production line equipment modification
- New utility service connection
- Building modification coordination
- Modifications/additions to office interiors
- Obsolete process area demolition
- Work deck and platform fabrication
- Overhead conveyor system installation
- Jig design and fabrication
- Off-line repair booth design and installation
- Ductwork and exhaust system installation

- Process area lighting retrofit and installation
- Machinery erection and connection of utilities
- Relocation of existing machinery and service connections
- Mechanized lift platform engineering, fabrication and installation

THE MACLELLAN APPROACH

MacLellan's on-site support team has been trained to identify potential process improvements which ultimately lead to improved safety, cost savings or process enhancements for our customers.

MacLellan's project management team is often requested to participate in problem solving activities and develop alternative methods for achieving

targeted goals. Our engineering team, along with our technical support staff, has designed new fixtures, ergonomic lift platforms and off-line booths. We have also developed prototype devices for numerous applications and can manage the process from testing and refinement to the final design.

MEASURABLE RESULTS

Our managers receive formal project management training and are prepared to work with your team to achieve results similar to those demonstrated in the examples below.

- Our project group developed a unique lift assist mechanism to eliminate ergonomic issues associated with the manual lifting of hoods and trucks on automotive assembly lines. Our design work is an example of both continuous improvement and injury related cost avoidance.
- Our on-site team launched a three year building improvement project which included tuckpointing, resealing and painting the exterior of our customer's facility. This project improved the facility's structural integrity and reduced future utility costs.

- To accommodate customer space requirements, our maintenance team was called upon to remodel multiple office units which included the relocation of doors, walls and HVAC equipment. This office transformation was performed within a two day project window to keep the customer operational.

YOUR COMPETITIVE ADVANTAGE

MacLellan works in partnership with the companies we serve. From day one, we are committed to understanding your strategic objectives. We align our goals with yours so that as we work together, we become an extension of your organization. We are committed to continuously improving our operations, and thus our service delivery, which ultimately drives your competitive advantage. Because your business is our business, we are the trusted advisor that you turn to for industry knowledge, technological advancements and process efficiencies.
