

INDUSTRIAL WASTEWATER MANAGEMENT

MacLellan is bringing turnkey services to chemical/physical treatment installations around the world to help optimize performance and reduce operational costs.

Our Mission Statement

We bring people together who share our values and help them discover and achieve their potential.

We are disciplined in the development and use of innovative systems and practices.

We are a driving component in our business partners' competitive advantage.

MACLELLAN EXPERTISE: Many industries are faced with the task of maintaining and operating wastewater treatment facilities as a means of treating the waste by-products in compliance with environmental regulations. Our primary performance targets are to ensure environmental compliance, maintain continuous operation and deliver cost-effective service.

BEST PEOPLE, BEST SYSTEMS, BEST RESULTS

Wastewater operations can be expensive to operate and typically require personnel resources that may not be available internally or that could be better used in connection with the core function of the production facility. MacLellan provides an alternative to in-house operations by providing highly qualified and experienced personnel to operate and maintain wastewater facilities and perform preventative and reactive maintenance. MacLellan is experienced in providing turnkey industrial wastewater services from operator training, process optimization and startup services to continuous contract operations and the development of operations and maintenance manuals.

Related services:

- Filter press plate rebuilds
- Plumbing and piping modifications
- Equipment preventative maintenance
- Chemical dosing station construction
- Chemical distribution system installation

- De-watering systems operation and maintenance
- Reverse osmosis system operation and maintenance
- Paint detackification system operation and maintenance
- Diaphragm and chemical dosing pump rebuild and maintenance

AWARD-WINNING SERVICES

MacLellan is dedicated to adding value through a continuous improvement approach to both environmental issues and operational challenges. This dedicated focus on performance and safety has resulted in award-winning recognition for our clients' operations. At one site in the United States, where MacLellan performs the operation and maintenance of two wastewater treatment plants, the wastewater operation received an award for "Site of Excellence" from the state of Alabama's Water Environment Association.

CONNECTED WORLDWIDE

MacLellan managers around the world are linked through knowledge-sharing technology that allows them to learn from each other and share ideas and best practices. The MacLellan web-based "desktop" allows us to disseminate corporate and industry information, collaborate on major initiatives and discuss, review and brainstorm improvement suggestions. It also offers a portal into the MacLellan Academy, a comprehensive library and learning center offering training courses and resource materials across the organization. It is, in effect, a virtual office environment that enables our employees and customers to take advantage of innovations and process improvements from MacLellan locations all over the globe.

YOUR COMPETITIVE ADVANTAGE

MacLellan works in partnership with the companies we serve. From day one, we are committed to understanding your strategic objectives. We align our goals with yours so that as we work together, we become an extension of your organization. We are committed to continuously improving our operations, and thus our service delivery, which ultimately drives your competitive advantage. Because your business is our business, we are the trusted advisor that you turn to for industry knowledge, technological advancements and process efficiencies.
